# Call for papers IGRC 2008

## “NEW TECHNOLOGIES; INCREASING GAS COMPETITIVENESS”

The International Gas Union Research Conference, IGRC 2008, will be held at the Scientific Conference Center in Paris, the Cité des sciences et de l'industrie at October 8-10, 2008. This venue guarantees a professionally organised conference in a pleasant environment close to the heart of the city with "grandeur": Paris. The IGRC provides gas researchers and other interested business partners with an excellent opportunity to exchange thoughts and ideas.

- We call upon you to submit a paper for this conference. Papers should discuss significant results from research, development or demonstration projects related to the gas business in its broadest terms. Papers may address any part of the gas chain, from well to burner tip, and the wellness of the customer.

The final date for submission of abstracts is February 1st 2008

In the conference oral presentations will be given on the following subjects:

- A How a changing Gas Market can benefit from R&D
- B Interaction between Technology and Marketing
- C The next generation LNG
- D Strategy issues addressing underground storage technology
- E Pipeline integrity challenges and solutions (high and low pressure)
- F Facing gas quality issues in a liberalised market
- G Innovative use of natural gas
- H Addressing climate change
- I Working towards sustainable energy
- K E&P fit for the future
- L Increasing competitiveness of Gas Utilisation
- M Next generation of gas transmission and distribution

You are invited to submit an abstract on one of the above mentioned subjects. However, the poster session may have a wider scope and can include any gas-related subject: from well to wellness.
